

For Immediate Release

Security Networks and IC Realtime Video Solutions form Strategic Alliance

Partnership provides shared vision to drive new growth opportunities for both companies.

West Palm Beach, FL – January 29, 2009 – Security Networks and IC Realtime LLC., announced today a Strategic Alliance between the respective companies. The partnership will allow both companies to drive new growth opportunities while providing new and exciting revenue streams for their customers.

“Security Networks is always looking for new and exciting ways to help our affiliates earn more revenue and maximize profits on each sale. In the past most funding programs were able to offer “special” package kit pricing on alarm and video equipment via a distribution network only. By teaming up with IC Realtime we are able to offer the opportunity to purchase DVR’s, cameras and accessory packages directly from the manufacturer at a deeply discounted pricing structure said Gary Franklyn Security Networks Vice President of Business Development.

“This is a win, win and win partnership. We get additional business by selling more products to the Security Networks affiliate base, the affiliates benefit by getting unbeatable pricing on equipment, 24-7 tech support and sales and marketing materials to help them close the deal, and Security Networks gains by providing new and exciting revenue streams in this demanding economic environment” said Matt Sailor President of IC Realtime.

About Security Networks: Security Networks is a diversified, full service life safety solutions company providing security monitoring and related services to homeowners and businesses coast to coast. The company has also been recognized as one of the fastest growing companies in the industry.
