Established in 2006, IC Realtime has become a global innovator of video surveillance technology. We are a firm believer in that “How you do anything is how you do everything”. And so every day, and in every way, we strive to be the standard by which others are measured.

As an industry leader we were the first in the surveillance camera sector to introduce a 360-degree X 360-degree device. IC Realtime is a strong supporter of the new UL2802 performance testing standard for camera image quality. Our customer base includes Distribution & Strategic Partnerships, Security & AV channel dealers, Industry Alliances and buying groups.

Today, we are more than excited to introduce you (or in some cases, reintroduce you) to the company that put seeing in realtime on the horizon, IC Realtime!
IC Realtime Products Are Professional Quality Equipment Made To Last

“In order to keep everyone’s claims honest; we embrace UL’s 2802 Performance Testing Standard for Camera Image Quality, and stand behind our products with a 10 Year Warranty”
- Matt Sailor, IC Realtime CEO

10 Year Warranty

In 2014, IC Realtime implemented an industry-leading 10-year product warranty* and lifetime technical support for its products. Surveillance cameras, DVRs and NVRs are all covered under the warranty.

Offer your clients peace of mind knowing that their surveillance equipment is covered for a full decade.

*excluding hard-drives

UL Certified

IC Realtime has worked with UL to develop a performance certification standard for cameras.

Why? Because we believe honesty is the best policy.

The UL 2802 Performance Testing Standard for Camera Image Quality rates cameras with a series of performance-based parameters, including image resolution, relative illumination, dynamic range and more.

The ITM-9000 is one of those tools that you will guard carefully from others on your staff -- believe us, you will never want to be without it. The ITM-9000 is a camera tester that spans three major surveillance technologies: IP, AVS, and Analog. This tester pumps out POE for camera power without the need of an injector or POE switch. It can display full camera statistics such as signal link quality, POE voltage and amperage, and two-way data kilobyte flow. Instantly see and measure the real-time performance of your IP cameras without the need for a laptop.

- Ergonomic, Portable Design with One-hand Operation
- Third Party IPC Support via ONVIF
- Digital Multimeter Built In
- Audio and RS485 Control
- Ethernet Cabling Tester
- Aim / Focus IP Cameras during install
- Dual LED Flashlight
- Inter-operable with AVS/TVI/AHD/CVBS

The ITM-9000 will save any integrator hundreds of hours that would have been wasted trying to hunt down difficult problems.

Tough Enough to Handle the Most Extreme and Limited Locations

Customized surveillance recorders built to withstand the harshest weather conditions in the tough to integrate locations.

Harsh weather conditions sometimes destroy even the finest surveillance equipment. Regardless of intense local weather, clients need the protection video surveillance provides. That's where NEMA boxes come into the picture. NEMA boxes are graded at different levels depending on the amount of protection desired. These boxes can protect equipment from minor hazards like sunlight and dust all the way up to industrial chemicals and corrosive liquids or gasses.

The NEMA series consists of a full real-time Pentaplex recorder with internet accessibility, fused power distribution for all cameras and 120V AC outlets in a NEMA rated, fan cooled weatherproof box.
Introducing ella.

ella is the first cloud-based deep-learning engine that augments surveillance systems with natural language search capabilities to recognize and find objects, colors, people, vehicles and more. ella makes every second of video instantly searchable.

example:

“Look for a White Vehicle on Friday”

With ella it’s simple.

Just ask ella what you’re looking for and in seconds it’s there. ella is compatible with most brands that are currently being sold and is open to industry standard RTSP video.
Intelligent Video Search Engine

Our new product ‘ella’ is an open platform for smart video monitoring. From singular home cameras to data centers that stream 1000s of cameras, ella works with all cameras, DVRs, NVRs, and VMSs that support standard H.264 RTSP video streams.

Ella Pro
Ella Pro Intelligent Video Search - Up To 8 Streams

Cloud Storage
ella serves all recorded video from the cloud. You’ll never have to worry about reliability or speed.

Ella
Ella Intelligent Video Search - Up To 3 Streams

Personalized Alerts
Search-based video alerts tell you whenever something important happens that matches your query.
WHAT IS THE EDGE SERIES?

The line consists of an 8 channel NVR recorder with built-in POE and a great combination of 2-4MP bullet and dome IP cameras. Dealers can now compete with aggressive surveillance offerings and still maintain a 7 year warranty supported by a US based dealer and end user technical support.

Because thermal cameras are sensitive to temperature, they have the ability to detect fire at long distances. High thermal sensitivity makes cameras capture more image details and temperature difference information.

IC Realtime’s Thermal IP cameras offer dual lens solutions where thermal and visible video capture is desired. A perfect all-in-one indoor & outdoor solution monitoring in total darkness while retaining ability to confirm details.

In addition to built-in intelligent video analytics for detecting & analyzing moving objects, these devices use uncooled VOx sensor technology that deliver consistent performance at a cost effective figure.
